Formulation & Reconstitution

**Background** 

**DIMA Disclaimer** 

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a cell surface receptor expressed on natural killer (NK) cells (and some T cells) that mediate non-major histocompatibility complex (MHC) restricted killing. The interaction between NK-cell and target cells via this receptor

is thought to modulate NK-cell cytolytic activity. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.

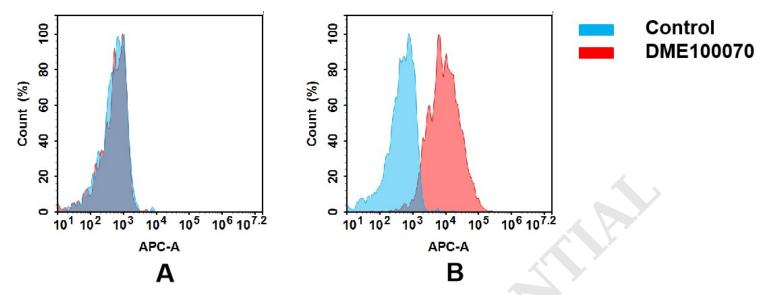

Figure 5. Flow cytometry analysis of antigen binding of rabbit anti-human 2B4 mAb(DME100070). (A) DME100070 does not bind to CHO-S cells that do not express 2B4. (B) A clear peak shift of DME100070 was seen compared to the control when incubated with 2B4-expressing THP-1 cells, indicating strong binding of DME100070 to 2B4. Antibodies were incubated at 5  $\mu$ g/mL.
