

PRODUCT INFORMATION

| | |
|------------------------------|--|
| Clone ID | DM216 |
| Target | GFAP |
| Synonyms | ALXDRD |
| Host Species | Rabbit |
| Description | Anti-GFAP(68-377) antibody(DM216); Rabbit mAb |
| Delivery | In Stock |
| Uniprot ID | P14136 |
| IgG type | Rabbit IgG |
| Clonality | Monoclonal |
| Reactivity | Human |
| Applications | ELISA |
| Recommended Dilutions | ELISA 1:5000-10000 |
| Purification | Purified from cell culture supernatant by affinity chromatography |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage & Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature. |
| Background | This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease; a rare disorder of astrocytes in the central nervous system. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq; Oct 2008] |
| Usage | Research use only |

Figure 1. ELISA plate pre-coated by 1 µg/ml (100 µl/well) Human GFAP(68-377) protein, His tagged protein ([getskuurl sku="PME100667"]) can bind Rabbit anti-GFAP(68-377) monoclonal antibody(clone: DM216) in a linear range of 1-50 ng/ml.
