

## **PRODUCT INFORMATION**

**Target** AXL

AXL;UFO **Synonyms** 

Recombinant human AXL protein with C-terminal **Description** 

6×His tag

**Delivery** In Stock **Uniprot ID** P30530 **Expression Host HEK293** 

Tag C-6×His Tag

Molecular

**Purity** 

**Background** 

AXL(Ala26-Pro449) 6×His tag Characterization

The protein has a predicted molecular mass of **Molecular Weight** 

46.6 kDa after removal of the signal peptide. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the Tyro3-Axl-Mer (TAM) receptor tyrosine kinase subfamily. The encoded protein possesses an extracellular domain which is composed of two immunoglobulin-like motifs at the N-terminal, followed by two fibronectin type-III motifs. It

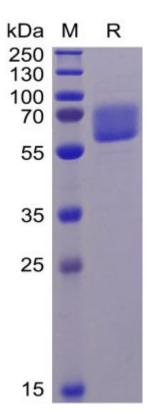

transduces signals from the extracellular matrix into the cytoplasm by binding to the vitamin K-dependent protein growth arrest-specific 6 (Gas6). This gene may be involved in several cellular functions including growth, migration, aggregation and anti-inflammation in multiple cell

types. Alternative splicing results in multiple transcript variants of this gene.

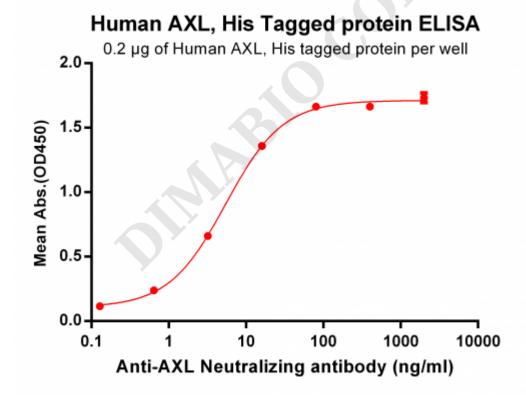

Research use only Usage

**Figure 1.** Human AXL Protein, His Tag on SDS-PAGE under reducing condition.

**Figure 2.** ELISA plate pre-coated by 2  $\mu$ g/ml (100  $\mu$ l/well) Human AXL, His tagged protein (PME100070) can bind Anti-AXL Antibody ([getskuurl sku="BME100033"]) in a linear range of 0.64-80.0 ng/ml.
