

PRODUCT INFORMATION

CB1 **Target**

CANN6;CB-R;CB1;CB1A;CB1K5;CB1R;CNR **Synonyms**

Recombinant Human CB1 protein with C-terminal **Description**

human Fc

Delivery In Stock **Uniprot ID** P21554 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

CB1(Met1-Gln116) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 39.3 kDa after removal of the signal peptide.The

Molecular Weight apparent molecular mass of CB1-hFc is

approximately 55-70 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of two cannabinoid receptors. The cannabinoids, principally delta-9tetrahydrocannabinol and synthetic analogs, are psychoactive ingredients of marijuana. The cannabinoid receptors are members of the guanine-nucleotide-binding protein (G-protein) coupled receptor family, which inhibit adenylate

Background cyclase activity in a dose-dependent,

stereoselective and pertussis toxin-sensitive manner. The two receptors have been found to be involved in the cannabinoid-induced CNS effects (including alterations in mood and cognition) experienced by users of marijuana. Multiple transcript variants encoding two different protein isoforms have been described for this gene.

Usage Research use only

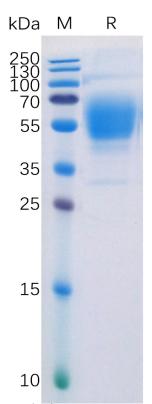

Figure 1. Human CB1 Protein, hFc Tag on SDS-PAGE under reducing condition.

Human CB1 (1-116) Protein, hFc Tagged protein ELISA

0.2 μg of Human CB1(1-116), hFc tagged protein per well

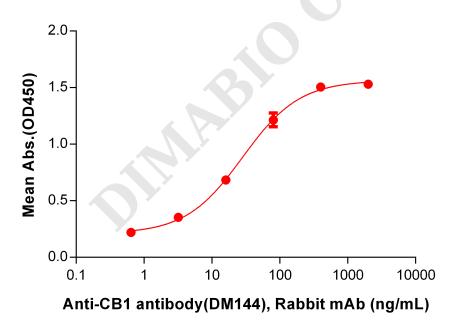

Figure 2. ELISA plate pre-coated by 2 μ g/mL (100 μ L/well) Human CB1(1-116) Protein, hFc Tag (PME100507) can bind Anti-CB1 antibody(DM144), Rabbit mAb in a linear range of 3.20–16 ng/mL.
