

PRODUCT INFORMATION

CD106 **Target**

Synonyms VCAM1;V-CAM 1;VCAM-1;INCAM-100

Recombinant human CD106 protein with C-**Description**

terminal 6×His tag

Delivery In Stock **Uniprot ID** P19320 **HEK293 Expression Host**

Tag C-6×His Tag

Molecular Characterization

Reconstitution

Background

CD106(Phe25-Glu698) 6×His tag

The protein has a predicted molecular mass of **Molecular Weight**

75.1 kDa after removal of the signal peptide. The apparent molecular mass of CD106-His is

approximately 100-130 kDa due to glycosylation.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation &

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene is a member of the Ig superfamily and encodes a cell surface sialoglycoprotein

expressed by cytokine-activated endothelium. This type I membrane protein mediates leukocyte-endothelial cell adhesion and signal transduction, and may play a role in the development of artherosclerosclerosis and rheumatoid

arthritis. Three alternatively spliced transcripts encoding different isoforms have been described for this gene. [provided by RefSeq, Dec 2010]
