

PRODUCT INFORMATION

CD99 Target

Synonyms HBA71;MIC2;MIC2X;MIC2Y;MSK5X

Recombinant Human CD99 with C-terminal **Description**

human Fc tag

Delivery In Stock **Uniprot ID** P14209 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

CD99(Asp23-Asp122) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight**

36.2 kDa after removal of the signal peptide. The apparent molecular mass of CD99-hFc is

approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a cell surface glycoprotein involved in leukocyte migration, T-

cell adhesion, ganglioside GM1 and

transmembrane protein transport, and T-cell death by a caspase-independent pathway. In addition, the encoded protein may have the ability to rearrange the actin cytoskeleton and

Background may also act as an oncosuppressor in

osteosarcoma. This gene is found in the pseudoautosomal region of chromosomes X and Y and escapes X-chromosome inactivation. There is a related pseudogene located immediately
