

PRODUCT INFORMATION

Target CLU

AAG4;APOJ;CLI;KUB1;MGC24903;SGP-2;SGP2;SP-40;TRPM-2;TRPM2 **Synonyms**

Description Recombinant human CLU protein with C-terminal 6×His tag

Delivery In Stock **Uniprot ID** P10909 **Expression Host HEK293** Tag C-6×His Tag

Purity

Storage & Shipping

Background

Molecular CLU(Asp23-Glu449) 6×His tag Characterization

The protein has a predicted molecular mass of 50.9 kDa after removal of the signal peptide. The apparent molecular mass of CLU-His is approximately 35-55 kDa due to glycosylation. **Molecular Weight**

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Formulation & Reconstitution

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

The proteins are snipped at ambient temperature.

The protein encoded by this gene is a secreted chaperone that can under some stress conditions also be found in the cell cytosol. It has been suggested to be involved in several basic biological events such as cell death, tumor progression, and neurodegenerative disorders. Alternate splicing results in both coding and non-coding variants.[provided by RefSeq, May 2011]
