

PRODUCT INFORMATION

DAP10 **Target**

Synonyms HCST; KAP10; PIK3AP

Recombinant human DAP10 protein with C-**Description**

terminal human Fc tag

Delivery In Stock **Uniprot ID** Q9UBK5 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Background

DAP10(Gln19-Pro48) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight**

29.1 kDa after removal of the signal peptide. The apparent molecular mass of DAP10-hFc is approximately 25-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a transmembrane signaling adaptor that contains a YxxM motif in its cytoplasmic domain. The encoded protein may form part of the immune recognition receptor complex with the C-type lectin-like receptor NKG2D. As part of this receptor complex, this protein may activate phosphatidylinositol 3kinase dependent signaling pathways through its intracytoplasmic YxxM motif. This receptor

complex may have a role in cell survival and proliferation by activation of NK and T cell responses. Alternative splicing results in two transcript variants encoding different isoforms.
