

PRODUCT INFORMATION

PDL1 **Target**

PD-L1;CD274;B7-H1;PDCD1L1;PDCD1LG1 **Synonyms** Recombinant human PD-L1 protein with C-

Description terminal mouse Fc and 6×His tag

Delivery In Stock **Uniprot ID** Q9NZQ7 **Expression Host HEK293**

Tag C-Mouse Fc and 6×His Tag

Molecular PD-L1(Phe19-Arg238) mFc(Pro99-Lys330) 6×His

Characterization

The protein has a predicted molecular mass of **Molecular Weight** 52.3 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes an immune inhibitory receptor ligand that is expressed by hematopoietic and non-hematopoietic cells, such as T cells and B cells and various types of tumor cells. The encoded protein is a type I transmembrane protein that has immunoglobulin V-like and C-like domains. Interaction of this ligand with its

receptor inhibits T-cell activation and cytokine production. During infection or inflammation of normal tissue, this interaction is important for preventing autoimmunity by maintaining

homeostasis of the immune response. In tumor microenvironments, this interaction provides an immune escape for tumor cells through cytotoxic T-cell inactivation. Expression of this gene in tumor cells is considered to be prognostic in many types of human malignancies, including colon cancer and renal cell carcinoma. Alternative splicing results in multiple transcript variants.

Background

Usage

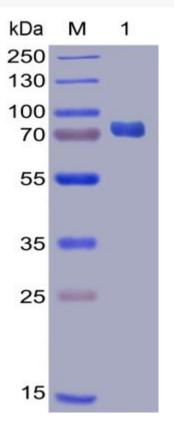

Figure 1. Human PD-L1 Protein, mFc-His Tag on SDS-PAGE under reducing condition.

Human PDL1, mFc-His Tagged protein ELISA

0.2 µg of Human PDL1, mFc-His Tagged protein per well

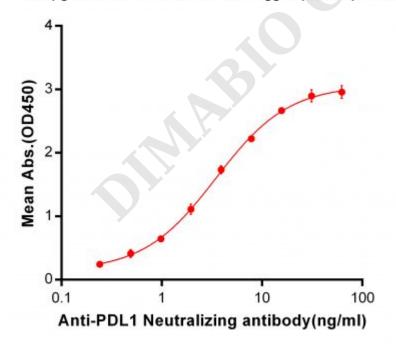

Figure 2. ELISA plate pre-coated by 2 μ g/ml (100 μ l/well) Human PD-L1, mFc-His tagged protein ([getskuurl sku="PME100023"]) can bind Anti-PDL1 Neutralizing antibody ([getskuurl sku="BME100009"]) in a linear range of 0.24-7.81 ng/ml.
