

PRODUCT INFORMATION

Clone ID 15D6

Target ACVR2A

Synonyms ACVR2; ACTRII

Host Species Rabbit

Description Anti-ACVR2A antibody(15D6), IgG1 Chimeric mAb

Delivery In Stock Uniprot ID P27037

IgG type Rabbit/Human Fc chimeric IgG1

Clonality Monoclonal
Reactivity Human
Applications Flow Cyt

Recommended Dilutions

Flow Cyt 1/100

Purification Purified from cell culture supernatant by affinity

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in

lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

This gene encodes a receptor that mediates the functions of activins, which are members of the transforming growth factor-beta (TGF-beta) superfamily involved in diverse biological processes. The encoded protein is a

transmembrane serine-threonine kinase receptor

which mediates signaling by forming heterodimeric complexes with various combinations of type I and type II receptors and

ligands in a cell-specific manner. The encoded type II receptor is primarily involved in ligand-binding and includes an extracellular ligand-binding domain, a transmembrane domain and a cytoplasmic serine-threonine kinase domain. This gene may be associated with susceptibility to preeclampsia, a pregnancy-related disease which can result in maternal and fetal morbidity and mortality. Alternative splicing results in multiple transcript variants of this gene. [provided by

RefSeq, Jun 2013]

Usage Research use only **Conjugate** Unconjugated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse anginogring attempt is prohibited. We are
