

PRODUCT INFORMATION

| | |
|---|---|
| Clone ID | 1F4 |
| Target | BTC |
| Synonyms | Betacellulin |
| Host Species | Rabbit |
| Description | Anti-BTC antibody(1F4), Rabbit mAb |
| Delivery | In Stock |
| Uniprot ID | P35070 |
| IgG type | Rabbit IgG |
| Clonality | Monoclonal |
| Reactivity | Human |
| Applications | Flow Cyt |
| Recommended Dilutions | Flow Cyt 1/100 |
| Purification | Purified from cell culture supernatant by affinity chromatography |
| Endotoxin | Less than 1.0 EU/ μ g by the LAL method. For <1 EU/mg requirements, please contact us for customization. |
| Formulation & Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. |
| Storage&Shipping | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). |
| Background | This gene encodes a member of the epidermal growth factor (EGF) family of proteins. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate the secreted growth factor. A secreted form and a membrane-anchored form of this protein bind to multiple different EGF receptors. This protein promotes pancreatic cell proliferation and insulin secretion, as well as retinal vascular permeability. Mutations in this gene may be associated with type 2 diabetes in human patients. [provided by RefSeq, Nov 2015] |
| Usage | Research use only |
| Conjugate | Unconjugated |

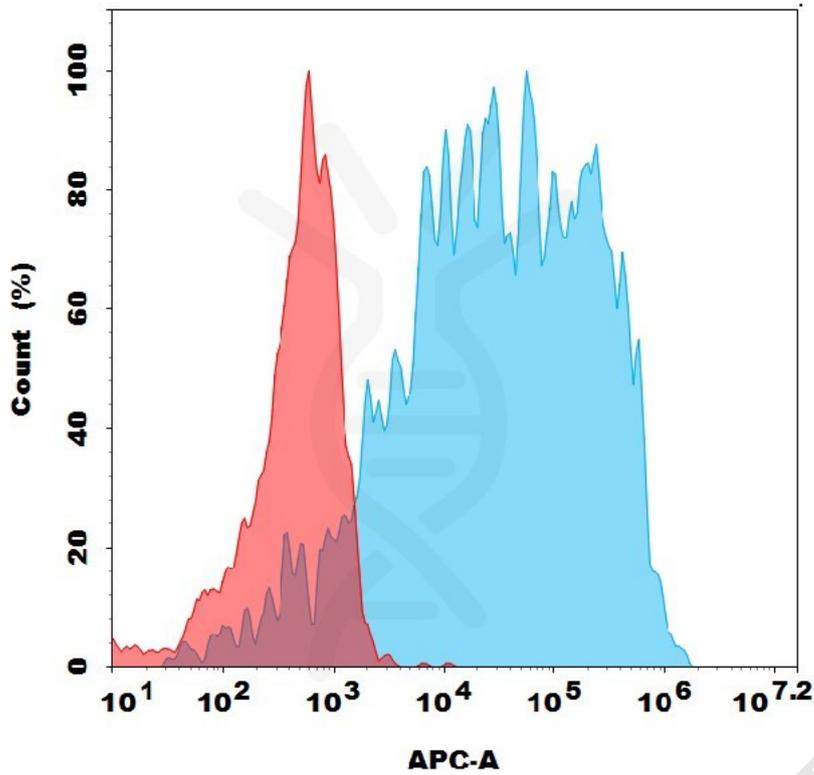

Figure 1. Flow cytometry analysis with 2 μ g/mL Anti-BTC (1F4) mAb on HEK293 cells transfected with human BTC (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).
