

## **PRODUCT INFORMATION**

| Clone ID                        | DM103  |
|---------------------------------|--|
| Target                          | CD30   |
| Synonyms                        | TNFRSF8;CD30;D1S166E;Ki-1  |
| Host Species                    | Rabbit   |
| Description                     | Anti-CD30 antibody(DM103); Rabbit mAb  |
| Delivery                        | In Stock   |
| Uniprot ID                      | P28908   |
| lgG type                        | Rabbit IgG   |
| Clonality                       | Monoclonal   |
| Reactivity                      | Human  |
| Applications                    | ELISA; Flow Cyt  |
| Recommended<br>Dilutions        | ELISA 1:5000-10000; Flow Cyt 1:100   |
| Purification                    | Purified from cell culture supernatant by affinity<br>chromatography   |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 %<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.<br>Store at 20°C to 20°C for 12 months in  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.   |
| Background                      | The protein encoded by this gene is a member of<br>the TNF-receptor superfamily. This receptor is<br>expressed by activated; but not by resting; T and<br>B cells. TRAF2 and TRAF5 can interact with this<br>receptor; and mediate the signal transduction<br>that leads to the activation of NF-kappaB. This<br>receptor is a positive regulator of apoptosis; and<br>also has been shown to limit the proliferative<br>potential of autoreactive CD8 effector T cells and<br>protect the body against autoimmunity. Two<br>alternatively spliced transcript variants of this<br>gene encoding distinct isoforms have been<br>reported. |
| Usage                           | Research use only  |
| Conjugate                       | Unconjugated   |
| DIMA Disclaimer                 | All DIMA recombinant antibodies are genuinely<br>generated by DIMA Biotech. They are all under<br>patent application. Any protein sequencing or<br>reverse engineering attempt is prohibited. We are<br>actively scrutinizing all patent application to<br>ensure no IP infringement.  |

Cat. No. DME100103

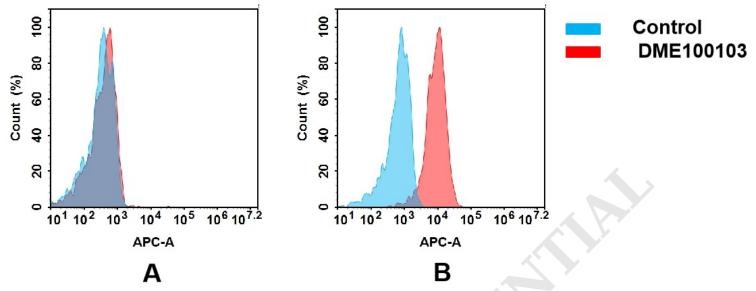

Figure 3. Flow cytometry analysis of antigen binding of rabbit anti-human CD30 mAb( DME100103).

(A) DME100103 does not bind to 293T cells that do not express CD30.
(B) A clear peak shift of DME100103 was seen compared to the control when incubated with CD30-expressing 8226 cells, indicating strong binding of DME100103 to CD30. Antibodies were incubated at 10 μg/mL.
