

## **PRODUCT INFORMATION**

Clone ID DMC273 **Target CD36** 

BDPLT10; CHDS7; FAT; GP3B; GP4; GPIV; PASIV; **Synonyms** 

SCARB3 Rabbit

**Host Species** 

**Description** Anti-CD36 antibody(DMC273); IgG1 Chimeric mAb

Delivery In Stock **Uniprot ID** P16671

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

Storage & Shipping

**Background** 

Flow Cyt 1:100 Dilutions

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene is the fourth major glycoprotein of the platelet surface and serves as a receptor for thrombospondin in platelets and various cell lines. Since thrombospondins are widely distributed proteins involved in a variety of adhesive processes; this

protein may have important functions as a cell adhesion molecule. It binds to collagen; thrombospondin; anionic phospholipids and

oxidized LDL. It directly mediates cytoadherence

of Plasmodium falciparum parasitized erythrocytes and it binds long chain fatty acids and may function in the transport and or as a

regulator of fatty acid transport. Mutations in this gene cause platelet glycoprotein deficiency. Multiple alternatively spliced transcript variants have been found for this gene.

Usage Research use only Conjugate Unconjugated
