

## **PRODUCT INFORMATION**

| Clone ID                        | DM118   |
|---------------------------------|---|
| Target                          | CD7   |
| Synonyms                        | CD7;GP40;TP41;LEU-9;Tp40  |
| Host Species                    | Rabbit  |
| Description                     | Anti-CD7 antibody(DM118); Rabbit mAb  |
| Delivery                        | In Stock  |
| Uniprot ID                      | P09564  |
| lgG type                        | Rabbit IgG  |
| Clonality                       | Monoclonal  |
| Reactivity                      | Human   |
| Applications                    | ELISA; Flow Cyt   |
| Recommended<br>Dilutions        | ELISA 1:5000-10000; Flow Cyt 1:100  |
| Purification                    | Purified from cell culture supernatant by affinity<br>chromatography  |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 %<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.<br>Store at -20°C to -80°C for 12 months in   |
| Storage & Shipping              | lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.  |
| Background                      | This gene encodes a transmembrane protein<br>which is a member of the immunoglobulin<br>superfamily. This protein is found on thymocytes<br>and mature T cells. It plays an essential role in T-<br>cell interactions and also in T-cell:B-cell<br>interaction during early lymphoid development. |
| Usage                           | Research use only   |
| Conjugate                       | Unconjugated  |
| DIMA Disclaimer                 | All DIMA recombinant antibodies are genuinely<br>generated by DIMA Biotech. They are all under<br>patent application. Any protein sequencing or<br>reverse engineering attempt is prohibited. We are<br>actively scrutinizing all patent application to<br>ensure no IP infringement.             |

Cat. No. DME100118

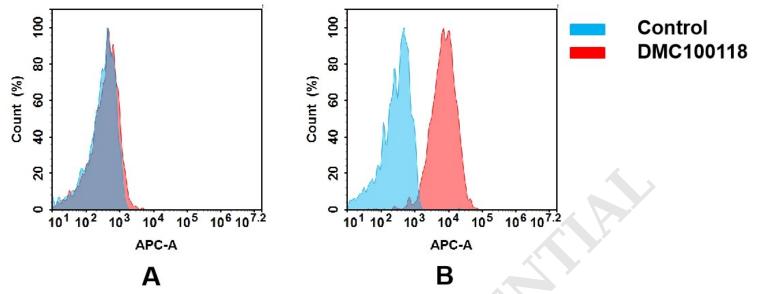

Figure 3. Flow cytometry analysis of antigen binding of rabbit anti-human CD7 mAb(DME100118).

(A) DME100118 does not bind to 293T cells that do not express CD7.
(B) A clear peak shift of DME100118 was seen compared to the control when incubated with CD7-expressing Jurkat cells, indicating strong binding of DME100118 to CD7. Antibodies were incubated at 10 μg/mL.
