

## **PRODUCT INFORMATION**

Clone ID **DMC680 Target** CXCR4

CD184; D2S201E; FB22; HM89; HSY3RR; LAP-3; LAP3; LCR1; LESTR; NPY3R; NPYR; NPYRL; **Synonyms** 

NPYY3R; WHIM; WHIMS

**Host Species** 

Anti-CXCR4 antibody(DMC680); IgG1 Chimeric **Description** 

mAb

In Stock Delivery

**Uniprot ID** P61073; A0A0U3FJG0; A0A0U3GXA9

Rabbit/Human Fc chimeric IgG1 IgG type

Monoclonal Clonality Reactivity Human **Applications** Flow Cyt

Recommended

**Background** 

Flow Cyt 1:100 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a CXC chemokine receptor specific for stromal cell-derived factor-1. The protein has 7 transmembrane regions and is located on the cell surface. It acts with the CD4 protein to support HIV entry into cells and is also highly expressed in breast cancer cells. Mutations

in this gene have been associated with WHIM (warts; hypogammaglobulinemia; infections; and

myelokathexis) syndrome. Alternate transcriptional splice variants; encoding different isoforms; have been characterized. [provided by

RefSeq; Jul 2008]

**Usage** Research use only

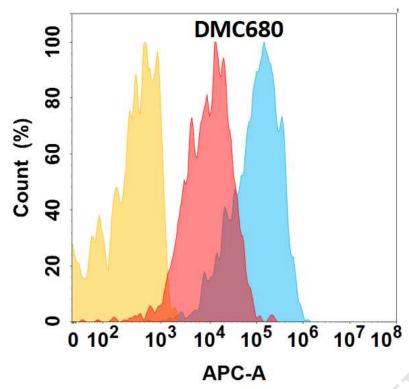

Figure 1. CXCR4 protein is expressed on the surface of Expi293 cell membrane. Flow cytometry analysis with Anti-CXCR4 (DMC680) on Expi293 cells transfected with human CXCR4 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram), and Isotype antibody on Expi293 transfected with irrelevant protein (Orange histogram).

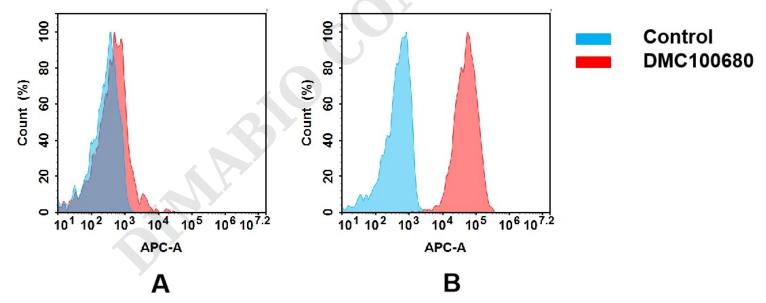

Figure 2. Flow cytometry analysis of antigen binding of anti-human CXCR4 mAb(DMC100680).

(A) DMC100680 does not bind to hepG2 cells that do not express CXCR4.
(B) A clear peak shift of DMC100680 was seen compared to the control when incubated with CXCR4-expressing Hela cells, indicating strong binding of DMC100680 to CXCR4. Antibodies were incubated at 5 μg/mL.
