Cat. No. DME100800

PRODUCT INFORMATION

Clone ID 21H9 **GFAP Target ALXDRD Synonyms Host Species** Rabbit

Description Anti-GFAP(68-377) antibody(21H9), Rabbit mAb

Delivery In Stock **Uniprot ID** P14136 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human **Applications ELISA**

Recommended **Dilutions**

ELISA 1:5000-10000

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Background

Storage & Shipping

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease, a rare disorder of

astrocytes in the central nervous system. Alternative splicing results in multiple transcript

variants encoding distinct isoforms. [provided by RefSeq, Oct 2008]

Usage Research use only

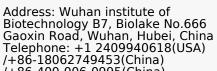

Conjugate Unconjugated

Anti-GFAP (21H9) mAb ELISA

0.1 µg of Human GFAP (68-377) Protein, His tagged protein per well

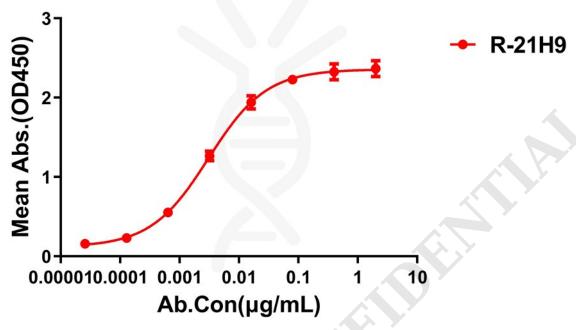

Figure 1. ELISA plate pre-coated by 1 μ g/ml (100 μ l/well) Human GFAP(68-377) protein, His tagged protein (PME100667) can bind Rabbit anti-GFAP(68-377) monoclonal antibody(clone: 21H9) in a linear range of 1-50 ng/ml.
