Cat. No. DME101327

PRODUCT INFORMATION

Clone ID 6F2 **Target** HA

HA, YPYDVPDYA **Synonyms**

Host Species Rabbit

Description Anti-HA tag antibody(6F2), Rabbit mAb

Delivery In Stock **Uniprot ID** N/A

IgG type Rabbit IgG Clonality Monoclonal

Reactivity N/A **Applications ELISA**

Recommended **Dilutions**

ELISA 1/5000-10000

Purified from cell culture supernatant by affinity **Purification**

chromatography

Formulation & Reconstitution

Powder

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not Storage & Shipping

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Protein tags are protein or peptide sequences located either on the C- or N- terminal of the target protein, which facilitates one or several of the following characteristics: solubility, detection, purification, localization and expression. The HA

tag is corresponds to amino acid residues
YPYDVPDYA of human influenza virus
hemagglutinin(HA). Many recombinant proteins

Background have been engineered to express the HA tag,

which does not appear to interfere with the bioactivity or the biodistribution of the recombinant protein. This tag facilitates the detection, isolation, and purification of the proteins. The HA tag is useful in western blotting and immunohistochemical localization of

expressed fusion proteins when examined with antibodies raised specifically against the HA-tag.

Usage Research use only

Conjugate Unconjugated

Anti-HA tag antibody(6F2), Rabbit mAb ELISA 0.1µg of PP6-HA protein per well

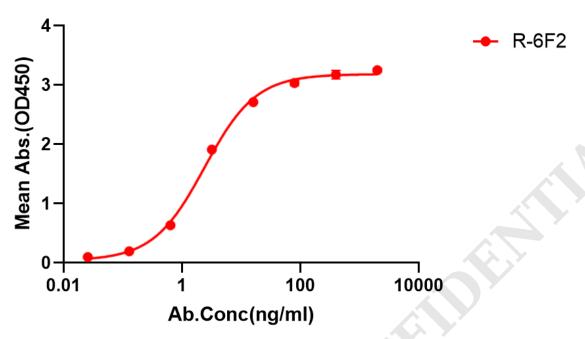

Figure 1. ELISA plate pre-coated by 1 μ g/ml (100 μ l/well) PP6-HA Protein can bind Rabbit anti-HA monoclonal antibody(clone: 6F2) in a linear range of 0.64-16 ng/ml.
