

PRODUCT INFORMATION

Clone ID	3A11
Target	IBSP
Synonyms	BSP;BNSP;SP-II;BSP-II
Host Species	Rabbit
Description	Anti-IBSP antibody(3A11), Rabbit mAb
Delivery	In Stock
Uniprot ID	P21815
IgG type	Rabbit IgG
Clonality	Monoclonal
Reactivity	Human
Applications	ELISA
Recommended Dilutions	ELISA 1/5000-10000
Purification	Purified from cell culture supernatant by affinity chromatography
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage & Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).
Background	The protein encoded by this gene is a major structural protein of the bone matrix. It constitutes approximately 12% of the noncollagenous proteins in human bone and is synthesized by skeletal-associated cell types, including hypertrophic chondrocytes, osteoblasts, osteocytes, and osteoclasts. The only extraskeletal site of its synthesis is the trophoblast. This protein binds to calcium and hydroxyapatite via its acidic amino acid clusters, and mediates cell attachment through an RGD sequence that recognizes the vitronectin receptor. [provided by RefSeq, Jul 2008]
Usage	Research use only
Conjugate	Unconjugated

Figure 1. ELISA plate pre-coated by 1 µg/ml (100 µl/well) Human IBSP Protein can bind Rabbit anti-IBSP monoclonal antibody(clone: 3A11) in a linear range of 0.1-100 ng/ml.
