

**PRODUCT INFORMATION**

<b>Clone ID</b>	DMC438
<b>Target</b>	Nectin-4
<b>Synonyms</b>	EDSS1; LNIR; nectin-4; PRR4; PVRL4
<b>Host Species</b>	Rabbit
<b>Description</b>	Anti-Nectin4 antibody(DMC438); IgG1 Chimeric mAb
<b>Delivery</b>	In Stock
<b>Uniprot ID</b>	Q96NY8
<b>IgG type</b>	Rabbit/Human Fc chimeric IgG1
<b>Clonality</b>	Monoclonal
<b>Reactivity</b>	Human
<b>Applications</b>	Flow Cyt
<b>Recommended Dilutions</b>	Flow Cyt 1:100
<b>Purification</b>	Purified from cell culture supernatant by affinity chromatography
<b>Formulation &amp; Reconstitution</b>	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
<b>Storage&amp;Shipping</b>	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
<b>Background</b>	This gene encodes a member of the nectin family. The encoded protein contains two immunoglobulin-like (Ig-like) C2-type domains and one Ig-like V-type domain. It is involved in cell adhesion through trans-homophilic and -heterophilic interactions. It is a single-pass type I membrane protein. The soluble form is produced by proteolytic cleavage at the cell surface by the metalloproteinase ADAM17:TACE. The secreted form is found in both breast tumor cell lines and breast tumor patients. Mutations in this gene are the cause of ectodermal dysplasia-syndactyly syndrome type 1; an autosomal recessive disorder. Alternatively spliced transcript variants have been found but the full-length nature of the variant has not been determined.
<b>Usage</b>	Research use only
<b>Conjugate</b>	Unconjugated
<b>DIMA Disclaimer</b>	All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are actively scrutinizing all patent application to ensure no IP infringement.

Figure 1. Flow cytometry analysis with Anti-Nectin4 (DMC438) on HEK293 cells transfected with human Nectin4 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).

Figure 2. Flow cytometry analysis of antigen binding of anti-human Nectin4 mAb(DMC100438).

(A) DMC100438 does not bind to 293T cells that do not express Nectin4.  
(B) A clear peak shift of DMC100438 was seen compared to the control when incubated with Nectin4-expressing A431 cells, indicating strong binding of DMC100438 to Nectin4. Antibodies were incubated at 2 µg/mL.
