Cat. No. DME100127B

PRODUCT INFORMATION

Clone ID DM127 **Target** BAFF-R

Synonyms BAFFR;TNFRSF13C;BAFF-R;BROMIX;CD268;CVID4;prolixin

Host Species Rabbit

Description Anti-BAFF-R antibody(DM127); Rabbit mAb

Delivery 2-3 weeks Q96RJ3 **Uniprot ID** IgG type Rabbit IgG Clonality Monoclonal Reactivity Human Flow Cyt **Applications**

Recommended

Background

Flow Cyt 1:100 Dilutions

Purified from cell culture supernatant by affinity **Purification**

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% Formulation & trehalose is added as protectants before lyophilization. Reconstitution

Please see Certificate of Analysis for specific instructions

of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated Storage & Shipping

freezing and thawing). Lyophilized proteins are shipped

at ambient temperature.

B cell-activating factor (BAFF) enhances B-cell survival in vitro and is a regulator of the peripheral B-cell population. Overexpression of Baff in mice results in

mature B-cell hyperplasia and symptoms of systemic lupus erythematosus (SLE). Also; some SLE patients have increased levels of BAFF in serum. Therefore; it has been proposed that abnormally high levels of BAFF may

contribute to the pathogenesis of autoimmune diseases by enhancing the survival of autoreactive B cells. The protein encoded by this gene is a receptor for BAFF and is a type III transmembrane protein containing a single extracellular cysteine-rich domain. It is thought that this receptor is the principal receptor required for BAFF-mediated mature B-cell surviva
