Cat. No. DME100211B

PRODUCT INFORMATION

Clone ID DM211 **CD43 Target**

Synonyms CD43; GALGP; GPL115; LSN

Host Species Rabbit

Description Anti-CD43 antibody(DM211); Rabbit mAb

Delivery 2-3 weeks **Uniprot ID** P16150 IgG type Rabbit IgG Clonality Monoclonal Reactivity Human

Applications ELISA; Flow Cyt

Recommended

Storage & Shipping

Background

ELISA 1:5000-10000; Flow Cyt 1:100 **Dilutions**

Purified from cell culture supernatant by affinity Purification

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & 8% trehalose is added as protectants before Reconstitution

lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a highly sialylated

glycoprotein that functions in antigen-specific activation of T cells; and is found on the surface of thymocytes; T lymphocytes; monocytes; granulocytes; and some B lymphocytes. It contains a mucin-like extracellular domain; a transmembrane region and a carboxy-terminal intracellular region. The extracellular domain has a high proportion of serine and threonine

residues; allowing extensive O-glycosylation; and has one potential N-glycosylation site; while the

carboxy-terminal region has potential

phosphorylation sites that may mediate transduction of activation signals. Different glycoforms of this protein have been described. In štimulated immunė cells; proteolytic cleavage of the extracellular domain occurs in some cell types; releasing a soluble extracellular fragment. Defects in expression of this gene are associated
