Cat. No. DMC100499B

## **PRODUCT INFORMATION**

Clone ID **DMC499 Target** CXCL1

**Synonyms** FSP; GRO1; GROa; MGSA; MGSA-a; NAP-3; SCYB1

**Host Species** Rabbit

Anti-CXCL1 antibody(DMC499); IgG1 Chimeric Description

mAb

**Delivery** 2-3 weeks **Uniprot ID** P09341

Rabbit/Human Fc chimeric IgG1 IgG type

Clonality Monoclonal Reactivity Human **Applications** Flow Cyt

Recommended

**Background** 

Flow Cyt 1:100 **Dilutions** 

Purified from cell culture supernatant by affinity **Purification** 

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This antimicrobial gene encodes a member of the CXC subfamily of chemokines. The encoded protein is a secreted growth factor that signals through the G-protein coupled receptor; CXC receptor 2. This protein plays a role in inflammation and as a chemoattractant for neutrophils. Aberrant expression of this protein is associated with the growth and progression of the protein the growth and progression of

certain tumors. A naturally occurring processed form of this protein has increased chemotactic activity. Alternate splicing results in coding and

non-coding variants of this gene. A pseudogene of this gene is found on chromosome 4. [provided by
