Cat. No. DME100216B

PRODUCT INFORMATION

Clone ID DM216

Target GFAP

Synonyms ALXDRD

Host Species Rabbit

DescriptionBiotinylated Anti-GFAP(68-377) antibody(DM216);

Delivery 2-3 weeks
Uniprot ID P14136
IgG type Rabbit IgG
Clonality Monoclonal

Reactivity Human
Applications ELISA

Recommended Dilutions

Background

DIMA Disclaimer

ELISA 1:5000-10000

PurificationPurified from cell culture supernatant by affinity

chromatography

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Storage & Shipping intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

This gene encodes one of the major intermediate filament proteins of mature astrocytes. It is used as a marker to distinguish astrocytes from other glial cells during development. Mutations in this gene cause Alexander disease; a rare disorder of astrocytes in the central nervous system.

Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by

RefSeq; Oct 2008]

Usage Research use only

Conjugate Biotinylated

All DIMA recombinant antibodies are genuinely generated by DIMA Biotech. They are all under patent application. Any protein sequencing or reverse engineering attempt is prohibited. We are

actively scrutinizing all patent application to

ensure no IP infringement.
