

## **PRODUCT INFORMATION**

4-1BB **Target** 

TNFRSF9;4-1BB;CD137;CDw137;ILA **Synonyms** 

Recombinant human 4-1BB protein with C-**Description** 

terminal 6×His tag

**Delivery** In Stock **Uniprot ID** Q07011 **Expression Host HEK293** 

Tag C-6×His Tag

Molecular Characterization

Reconstitution

**Background** 

Purity

41BB(Leu24-Gln186) 6×His

The protein has a predicted molecular mass of

18.1 kDa after removal of the signal peptide. The apparent molecular mass of 4-1BB-His is **Molecular Weight** 

approximately 25-35 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation &

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor contributes to the clonal expansion, survival, and

development of T cells. It can also induce proliferation in peripheral monocytes, enhance T cell apoptosis induced by TCR/CD3 triggered activation, and regulate CD28 co-stimulation to

promote Th1 cell responses. The expression of this receptor is induced by lymphocyte activation. TRAF adaptor proteins have been shown to bind to this receptor and transduce the signals leading to activation of NF-kappaB.
