

PRODUCT INFORMATION

Target ADGRE1

Synonyms EMR1; TM7LN3

Human ADGRE1 full length protein-synthetic **Description**

nanodisc 3-4 weeks

Delivery Uniprot ID Q14246 **Expression Host HEK293**

Protein Families Druggable Genome, Transmembrane

Protein Pathways

The human full length ADGRE1 protein has a MW **Molecular Weight**

of 97.5 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trialose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions. Do not use solvents with pH lower than 6.5 in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes apolipoprotein A-I, which is the

major protein component of high density lipoprotein (HDL) in plasma. The encoded preproprotein is proteolytically processed to generate the mature protein, which promotes cholesterol efflux from tissues to the liver for

excretion, and is a cofactor for lecithin

cholesterolacyltransferase (LCAT), an enzyme responsible for the formation of most plasma cholesteryl esters. This gene is closely linked with **Background**

two other apolipoprotein genes on chromosome 11. Defects in this gene are associated with HDL deficiencies, including Tangier disease, and with

systemic non-neuropathic amyloidosis.

Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein. [provided by RefSeq, Dec 2015]

ELISA assay to evaluate ADGRE1-Nanodisc 0.2µg Human ADGRE1-Nanodisc per well

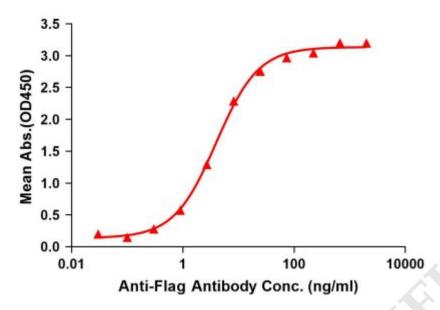

Figure 1. Elisa plates were pre-coated with Flag Tag ADGRE1-Nanodisc (0.2 μ g/per well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with ADGRE1-Nanodisc is 3.996ng/ml.

Figure 2. Human ADGRE1-Nanodisc, Flag Tag on SDS-PAGE
