

PRODUCT INFORMATION

C-Flag Tag Tag ADRB3 **Target Synonyms BETA3AR**

Human ADRB3 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P13945 **Expression Host HEK293**

GPCR, Transmembrane, Druggable Genome, **Protein Families**

Calcium regulation in cardiac cells, GPCRDB Class

Protein Pathways

A Rhodopsin-like, Monoamine GPCRs, Cancer, Metabolic and Obesity, Insulin

Signaling Pathway,

The human full length ADRB3 protein has a MW of **Molecular Weight**

43.5kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

The protein encoded by this gene belongs to the family of beta adrenergic receptors, which mediate catecholamine-induced activation of adenylate cyclase through the action of G

proteins. This receptor is located mainly in the adipose tissue and is involved in the regulation of lipolysis and thermogenesis. Obesity and bodyweight-related disorders are correlated with certain polymorphisms in three subtypes of beta-

adrenoceptor, among them, the ADRB3 gene.[provided by RefSeq, Oct 2019]

Usage Research use only Conjugate Unconjugated
