

PRODUCT INFORMATION

ASGR1 **Target**

Synonyms HL-1; ASGPR; ASGPR1; CLEC4H1

Recombinant human ASGR1(124-291) Protein Description with N-terminal human Fc tag

Delivery In Stock

Uniprot ID P07306 **Expression Host HEK293**

Tag N-Human Fc tag

Molecular

Background

hFc(Glu99-Ala330) ASGR1(Leu124-Leu291) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 45.6 kDa after removal of the signal peptide.

The purity of the protein is greater than 90% as determined by SDS-PAGE and Coomassie blue

Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before

Formulation & lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a subunit of the

asialoglycoprotein receptor. This receptor is a transmembrane protein that plays a critical role in serum glycoprotein homeostasis by mediating the endocytosis and lysosomal degradation of glycoproteins with exposed terminal galactose or

N-acetylgalactosamine residues. The asialoglycoprotein receptor may facilitate hepatic infection by multiple viruses including hepatitis B,

and is also a target for liver-specific drug delivery. The asialoglycoprotein receptor is a heterooligomeric protein composed of major and minor subunits, which are encoded by different genes. The protein encoded by this gene is the more
