Human CCL19 Protein, hFc Tag Cat. No. PME101236

PRODUCT INFORMATION

SynonymsCKb11;ELC;MIP-3b;MIP3B;SCYA19DescriptionRecombinant Human CCL19 Protein with C- terminal human Fc tagDeliveryIn StockUniprot IDQ99731Expression HostHEK293TagC-Ll19(Gly22-Ser98) hFc(Glu99-Ala330)Molecular CharacterizationCCL19(Gly22-Ser98) hFc(Glu99-Ala330)Molecular WeightAd 9 kDa after removal of the signal peptide. The apparent molecular mass of C1219-hFc is approximately 25-55 kDa due to glycosylation. The protein has a predicted molecular mass of colley.Fc is approximately 25-55 kD due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.Formulation & ReconstitutionStore at -20°C to -80°C for 12 months in lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized proteins are shipped at ambient temperature.BackgroundRekground the cyclkine genes clustered on the p-arm of chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and infamotory processes. The C cytokines are proteins characterized by two adjacent cysteines. The cytokine genes clustered on the p-arm of chromosome 9. Cytokines are a family of secreted proteins involved in immunoregulatory and infamotory processes. The C cytokines are proteins characterized by two adjacent cysteines. The cytokine genes dust and bein temperature.BackgroundResearch use onlyResearch use onlyUsageResearch use onlyResearch use onlyConjugateResearch use only	Target	CCL19
