

PRODUCT INFORMATION

CCL8 **Target**

C-C Motif Chemokine 8;HC14;Monocyte

Chemoattractant Protein 2;Monocyte Chemotactic Protein 2;MCP-2;Small-Inducible Cytokine A8;CCL8;MCP2;SCYA10;SCYA8 **Synonyms**

Recombinant Human C-C Motif Chemokine 8 is produced by our Mammalian expression system Description and the target gene encoding Gln24-Pro99 is

expressed with a 6His tag at the C-terminus.

Delivery In Stock **Uniprot ID** AAI26243.1 **Expression Host HEK293**

Tag C-6×His Tag

Molecular Not available Characterization

Molecular Weight 9.95 KDa

Greater than 95% as determined by reducing **Purity**

SDS-PAGE.

Lyophilized from a 0.2 μm filtered solution of 20mM PB, 150mM NaCl, 1mM EDTA, pH 7.4. Formulation & Reconstitution

> Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

témperature.

Human Chemokine (C-C Motif) Ligand 8 (CCL8) is produced by human MG63 osteosarcoma cells. CCL8 shares 62% and 58% amino acid sequence identity with MCP-1 and MCP-3, respectively. All three MCP proteins are monocyte chemoattractants. CCL8 is chemotactic for and

activates many different immune cells, including mast cells, eosinophils and basophils, which are **Background**

implicated in allergic response, and monocytes, T cells, and NK cells that are involved in the inflammatory response. CCL8 elicits its effects by

binding to several different cell surface receptors including CCR1, CCR2B and CCR5.

Research use only **Usage**

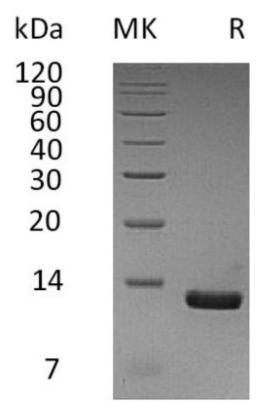

Figure 1. Greater than 95% as determined by reducing SDS-PAGE.
