

PRODUCT INFORMATION

CD14 **Target**

CD14 Molecule; Myeloid Cell-Specific Leucine-Rich **Synonyms**

Glycoprotein;CD14 Antigen;Monocyte

Differentiation Antigen CD14

Recombinant Human CD14(20-352) Protein with **Description**

C-terminal 7×His tag

Delivery In Stock **Uniprot ID** P08571 **Expression Host HEK293**

Tag C-7×His Tag

Molecular Characterization

Background

CD14(Thr20-Cys352) 7×His tag

The protein has a predicted molecular mass of

36.7 kDa after removal of the signal peptide. The apparent molecular mass of CD14(20-352)-7xHis **Molecular Weight** is approximately 35-55 kDa due to glycosylation. The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

Purity

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation & lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a surface antigen that is preferentially expressed on monocytes/macrophages. It cooperates with other proteins to mediate the innate immune response to bacterial lipopolysaccharide, and to viruses. This gene has been identified as a target

candidate in the treatment of SARS-CoV-2infected patients to potentially lessen or inhibit a severe inflammatory response. Alternative splicing results in multiple transcript variants encoding the same protein. [provided by RefSeq,

Aug 2020]

Usage Research use only

Conjugate Unconjugated
