

## **PRODUCT INFORMATION**

Tag C-Flag Tag

**CD36 Target** 

BDPLT10; CHDS7; FAT; GP3B; GP4; GPIV; PASIV; **Synonyms** 

SCARB3

Human CD36 full length protein-synthetic Description

nanodisc In Stock

**Delivery Uniprot ID** P16671 HFK293 **Expression Host** 

**Protein Families** Druggable Genome, Transmembrane

Adipocytokine signaling pathway, ECM-receptor interaction, Hematopoietic cell lineage, PPAR **Protein Pathways** 

signaling pathway

The human full length CD36 protein has a MW of **Molecular Weight** 

53.1 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein is the fourth major glycoprotein of the platelet surface and serves as a receptor for thrombospondin in platelets and various cell lines. Since thrombospondins are widely distributed proteins involved in a variety of adhesive processes, this protein may have important functions as a cell adhesion molecule. It binds to collagen, thrombospondin, anionic phospholipids and oxidized LDL. It directly mediates

cytoadherence of Plasmodium falciparum parasitized erythrocytes and it binds long chain fatty acids and may function in the transport and/or as a regulator of fatty acid transport. Mutations in this gene cause platelet glycoprotein deficiency. Multiple alternatively spliced transcript variants have been found for this gene.

Usage Research use only Conjugate Unconjugated

**Background** 

## ELISA assay to evaluate CD36-Nanodisc 0.2µg Human CD36-Nanodisc per well

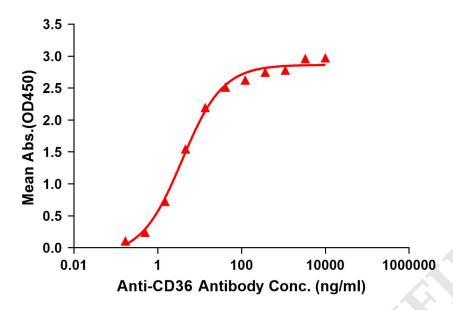

Figure 1. Elisa plates were pre-coated with Flag Tag CD36-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-CD36 monoclonal antibody (DMC100273) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-CD36 monoclonal antibody binding with CD36-Nanodisc is 3.826 ng/ml.
