Cat. No. FLP100050

PRODUCT INFORMATION

C-Flag Tag Tag

CD81 **Target**

Synonyms CVID6; S5.7; TAPA1; TSPAN28

Human CD81 full length protein-synthetic **Description**

nanodisc **Delivery** 3-4 weeks **Uniprot ID** P60033 **Expression Host HEK293**

Druggable Genome, ES Cell Differentiation/IPS, **Protein Families**

Transmembrane

Protein Pathways B cell receptor signaling pathway

The human full length CD81 protein has a MW of **Molecular Weight**

25.6 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins. This protein

appears to promote muscle cell fusion and support myotube maintenance. Also it may be involved in signal transduction. This gene is localized in the tumor-suppressor gene region and thus it is a candidate gene for malignancies. Two transcript variants encoding different

isoforms have been found for this gene. [provided

by RefSeq, Jul 2014]

Usage Research use only Conjugate Unconjugated

Background

ELISA assay to evaluate CD81-Nanodisc 0.2µg Human CD81-Nanodisc per well

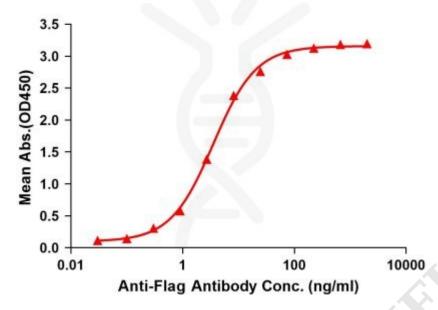

Figure 1. Elisa plates were pre-coated with Flag Tag CD81-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with CD81-Nanodisc is 3.551 ng/ml.
