

PRODUCT INFORMATION

C-Flag&Strep Tag Tag

Target CNGB1

CNCG2, CNCG3L, CNCG4, CNG4, CNGB1B, GAR1, GARP, GARP2, RCNC2, RCNCb, RCNCbeta, RP45 **Synonyms**

Human CNGB1-Strep full length protein-synthetic Description

nanodisc **Delivery** 6~8weeks **Uniprot ID** Q14028 **HEK293**

Protein Families Ion Channels: Cyclic nucleotide gated

Protein Pathways

Expression Host

Background

The human full length CNGB1-Strep protein has a **Molecular Weight**

MW of 139.7 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

In humans, the rod photoreceptor cGMP-gated cation channel helps regulate ion flow into the rod photoreceptor outer segment in response to lightinduced alteration of the levels of intracellular cGMP. This channel consists of two subunits, alpha and beta, with the protein encoded by this gene representing the beta subunit. Defects in

this gene are a cause of cause of retinitis pigmentosa type 45. Three transcript variants encoding different isoforms have been found for

this gene. [provided by RefSeq, Oct 2013]

Usage Research use only Conjugate Unconjugated
