

**PRODUCT INFORMATION**

|   |   |
|---|---|
| <b>Target</b>                           | CTSD  |
| <b>Synonyms</b>                         | CPSD; CLN10; HEL-S-130P   |
| <b>Description</b>                      | Recombinant human CTSD Protein with C-terminal 10×His tag   |
| <b>Delivery</b>                         | In Stock  |
| <b>Uniprot ID</b>                       | P07339  |
| <b>Expression Host</b>                  | HEK293  |
| <b>Tag</b>                              | C-10×His tag  |
| <b>Molecular Characterization</b>       | CTSD(Leu21-Leu412) 10×His tag   |
| <b>Molecular Weight</b>                 | The protein has a predicted molecular mass of 44.0 kDa after removal of the signal peptide. The apparent molecular mass of CTSD-His is approximately 35-55 kDa due to glycosylation.  |
| <b>Purity</b>                           | The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.  |
| <b>Formulation &amp; Reconstitution</b> | Lyophilized from sterile PBS, pH 7.4. Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.   |
| <b>Storage &amp; Shipping</b>           | Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.   |
| <b>Background</b>                       | This gene encodes a member of the A1 family of peptidases. The encoded preproprotein is proteolytically processed to generate multiple protein products. These products include the cathepsin D light and heavy chains, which heterodimerize to form the mature enzyme. This enzyme exhibits pepsin-like activity and plays a role in protein turnover and in the proteolytic activation of hormones and growth factors. Mutations in this gene play a causal role in neuronal ceroid lipofuscinosis-10 and may be involved in the pathogenesis of several other diseases, including breast cancer and possibly Alzheimer's disease. [provided by RefSeq, Nov 2015] |
| <b>Usage</b>                            | Research use only   |
| <b>Conjugate</b>                        | Unconjugated  |
