Cat. No. PME101870

## **PRODUCT INFORMATION**

**EGFR Target** 

ERBB, ERRP, HER1, mENA, ERBB1, NNCIS, PIG61, **Synonyms** 

NISBD2

Recombinant human EGFR(25-133) Protein with **Description** 

C-terminal human Fc tag

Delivery In Stock P00533 **Uniprot ID Expression Host** HFK293

Tag C-Human Fc tag

Molecular

**Purity** 

EGFR(Leu25-Lys133) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 38.6 kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a transmembrane glycoprotein that is a member of the protein kinase superfamily. This protein is a receptor for members of the epidermal growth factor family. EGFR is a cell surface protein that binds to epidermal growth factor, thus inducing

receptor dimerization and tyrosine autophosphorylation leading to cell proliferation. **Background** 

Mutations in this gene are associated with lung cancer. EGFR is a component of the cytokine storm which contributes to a severe form of Coronavirus Disease 2019 (COVID-19) resulting from infection with severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2). [provided

by RefSeq, Jul 2020]

Usage Research use only

Conjugate Unconjugated
