

PRODUCT INFORMATION

C-Flag Tag Tag

EMP2 **Target XMP Synonyms**

Human EMP2 full length protein-synthetic **Description**

nanodisc **Delivery** In Stock **Uniprot ID** P54851 **Expression Host HEK293**

Protein Families Transmembrane

Protein Pathways N/A

The human full length EMP2 protein has a MW of **Molecular Weight**

19.2 kDa

Formulation &

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution.

A tetraspan protein of the PMP22/EMP family. The encoded protein regulates cell membrane composition. It has been associated with various functions including endocytosis, cell signaling, cell proliferation, cell migration, cell adhesion, cell death, collecter by the collecter of th excretion, and embryo implantation. It is known to negatively regulate caveolin-1, a scaffolding

Lyophilized from nanodisc solubilization buffer (20

protein which is the main component of the **Background** caveolae plasma membrane invaginations found in most cell types. Through activation of PTK2 it positively regulates vascular endothelial growth factor A. It also modulates the function of specific

integrin isomers in the plasma membrane. Up-regulation of this gene has been linked to cancer progression in multiple different tissues.

Mutations in this gene have been associated with nephrotic syndrome type 10 (NPHS10).

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping Lyophilized proteins are shipped at ambient

témperature.

Usage Research use only

Conjugate Unconjugated

ELISA assay to evaluate EMP2-Nanodisc 0.2µg Human EMP2-Nanodisc per well

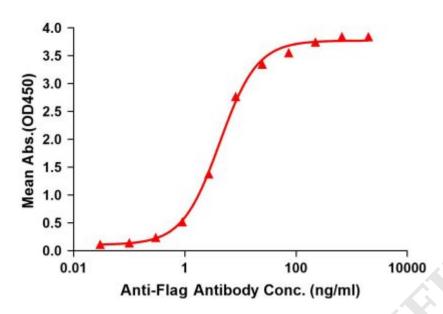

Figure 1. Elisa plates were pre-coated with Flag Tag EMP2-Nanodisc ($0.2\mu g/per$ well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with EMP2-Nanodisc is 4.249 ng/ml.
