

## **PRODUCT INFORMATION**

Target EMP2 Synonyms XMP

**Description**Human EMP2 full length protein-synthetic nanodisc

Delivery In Stock
Uniprot ID P54851
Expression Host HEK293

**Protein Families** Transmembrane

**Protein Pathways** N/A

Molecular Weight The human full length EMP2 protein has a MW of

19.2 kDa

Formulation & Reconstitution

**Background** 

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with pH lower than 6.5 in subsequent experiments. A tetraspan protein of the PMP22/EMP family. The encoded protein regulates cell membrane

encoded protein regulates cell membrane composition. It has been associated with various functions including endocytosis, cell signaling, cell proliferation, cell migration, cell adhesion, cell death, cholesterol homeostasis, urinary albumin excretion, and embryo implantation. It is known to negatively regulate caveolin-1, a scaffolding protein which is the main component of the caveolae plasma membrane invaginations found

in most cell types. Through activation of PTK2 it positively regulates vascular endothelial growth factor A. It also modulates the function of specific integrin isomers in the plasma membrane. Upregulation of this gene has been linked to cancer

progression in multiple different tissues.

Mutations in this gene have been associated with nephrotic syndrome type 10 (NPHS10).

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

**Storage & Shipping** intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

Usage Research use only

## ELISA assay to evaluate EMP2-Nanodisc 0.2µg Human EMP2-Nanodisc per well

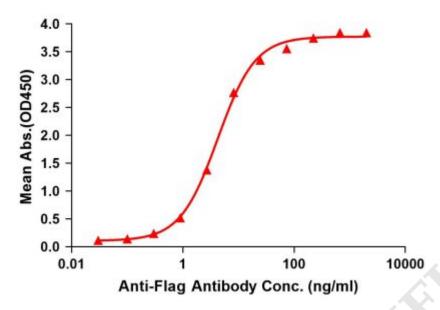

Figure 1. Elisa plates were pre-coated with Flag Tag EMP2-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with EMP2-Nanodisc is 4.249 ng/ml.
