

PRODUCT INFORMATION

EREG Target

Synonyms Ep;EPR;ER

Recombinant Human EREG with C-terminal **Description**

human Fc tag

Delivery In Stock **Uniprot ID** 014944 **Expression Host HEK293**

Tag C-Human Fc Tag

Molecular

Background

EREG(Val63-Leu108) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 31.4 kDa after removal of the signal peptide. The **Molecular Weight**

apparent molecular mass of EREG-hFc is

approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a secreted peptide hormone and member of the epidermal growth factor (EGF) family of proteins. The encoded protein is a ligand of the epidermal growth factor receptor (EGFR) and the structurally related erb-b2 receptor tyrosine kinase 4 (ERBB4). The encoded protein may be involved in a wide range of biological

processes including inflammation, wound healing, oocyte maturation, and cell proliferation.

Additionally, the encoded protein may promote the progression of cancers of various human
