

PRODUCT INFORMATION

FGF1 **Target**

AFGF; ECGF; FGFA; ECGFA; ECGFB; FGF-1; HBGF1; **Synonyms**

HBGF-1; GLIO703; ECGF-beta; FGF-alpha

Recombinant human FGF1 Protein with C-terminal **Description**

human Fc tag

Delivery In Stock P05230 **Uniprot ID Expression Host HFK293**

Tag C-Human Fc tag

Molecular

Purity

Background

FGF1(Phe16-Asp155) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of **Molecular Weight** 42.0 kDa after removal of the signal peptide.

The purity of the protein is greater than 90% as determined by SDS-PAGE and Coomassie blue

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation & - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store

Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of

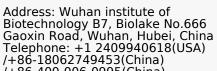

biological processes, including embryonic

development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. This protein functions as a modifier of endothelial cell migration and proliferation, as well as an

angiogenic factor. It acts as a mitogen for a variety of mesoderm- and neuroectoderm-derived cells in vitro, thus is thought to be involved in organogenesis. Multiple alternatively spliced variants encoding different isoforms have been described. [provided by RefSeq, Jan 2009]

Usage Research use only

Conjugate Unconjugated
