

## **PRODUCT INFORMATION**

C-Flag Tag Tag

**GIPR Target** PGQTL2 **Synonyms** 

Human GIPR full length protein-synthetic **Description** 

nanodisc **Delivery** In Stock **Uniprot ID** P48546 **Expression Host HEK293** 

**Protein Families** Druggable Genome, GPCR, Transmembrane

**Protein Pathways** Neuroactive ligand-receptor interaction

The human full length GIPR protein has a MW of **Molecular Weight** 

53.2 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

A G-protein coupled receptor for gastric inhibitory polypeptide (GIP), which was originally identified as an activity in gut extracts that inhibited gastric

acid secretion and gastrin release, but subsequently was demonstrated to stimulate insulin release in the presence of elevated **Background** glucose. Mice lacking this gene exhibit higher

blood glucose levels with impaired initial insulin response after oral glucose load. Defect in this gene thus may contribute to the pathogenesis of

diabetes.

**Usage** Research use only

Conjugate Unconjugated

Address: Wuhan institute of Biotechnology B7, Biolake No.666 Gaoxin Road, Wuhan, Hubei, China Telephone: +1 2409940618(USA) /+86-18062749453(China) /+86-400-006-0995(China)

## **ELISA assay to evaluate GIPR-Nanodisc** 0.2µg Human GIPR-Nanodisc per well

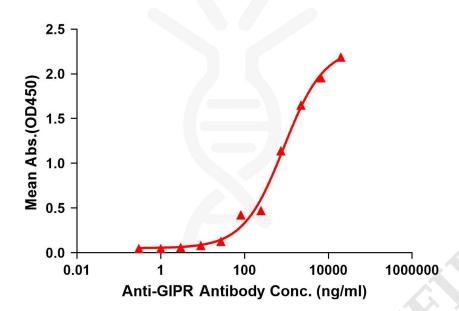

Figure 1. Elisa plates were pre-coated with Flag Tag GIPR-Nanodisc (0.2 $\mu$ g/per well). Serial diluted anti-GIPR monoclonal antibody (BME100209) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-GIPR monoclonal antibody binding with GIPR-Nanodisc is 862.5 $\mu$ g/ml.

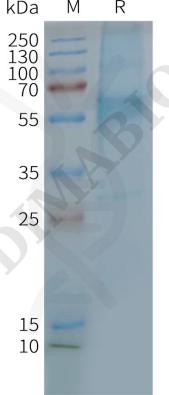

Figure 2. Human GIPR-Nanodisc, Flag Tag on SDS-PAGE
