Cat. No. FLP100266

PRODUCT INFORMATION

C-Flag Tag Tag GP143 **Target Synonyms** NYS6, OA1

Human GP143 full length protein-synthetic **Description**

nanodisc **Delivery** 6~8weeks **Uniprot ID** P51810 **Expression Host HEK293**

Protein Families Transmembrane, Druggable Genome,

Protein Pathways GPCRDB Other,

Storage & Shipping

Background

The human full length GP143 protein has a MW of **Molecular Weight**

43.9kDa

mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions. Do not use solvents with a pH below 6.5 or those containing high concentrations of divalent metal ions (greater than 5 mM) in subsequent experiments. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

Lyophilized from nanodisc solubilization buffer (20

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

témperature.

This gene encodes a protein that binds to heterotrimeric G proteins and is targeted to melanosomes in pigment cells. This protein is thought to be involved in intracellular signal transduction mechanisms. Mutations in this gene cause ocular albinism type 1, also referred to as

Nettleship-Falls type ocular albinism, a severe visual disorder. A related pseudogene has been identified on chromosome Y. [provided by RefSeq,
