Cat. No. FLP100116

## **PRODUCT INFORMATION**

C-Flag Tag Tag GPR132 **Target** 

**Synonyms** G2A

Human GPR132 full length protein-synthetic **Description** nanodisc

**Delivery** In Stock **Uniprot ID** Q9UNW8 **Expression Host HEK293** 

Druggable Genome, GPCR, Transmembrane **Protein Families** 

**Protein Pathways** 

The human full length GPR132 protein has a MW **Molecular Weight** 

of 42.5 kDa

Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% – 8% trehalose is added as protectants before Formulation & Reconstitution lyophilization. Please see Certificate of Analysis

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

The protein is a member of the guanine nucleotide-binding protein (G protein)-coupled receptor (GPCR) superfamily. The receptors are seven-pass transmembrane proteins that respond to extracellular cues and activate intracellular signal transduction pathways. This protein was

**Background** reported to be a receptor for

lysophosphatidylcholine action, but PubMedID: 15653487 retracts this finding and instead suggests this protein to be an effector of lysophosphatidylcholine action. This protein may

have proton-sensing activity and may be a receptor for oxidized free fatty acids.

**Usage** Research use only

Conjugate Unconjugated

## ELISA assay to evaluate GPR132-Nanodisc 0.2µg Human GPR132-Nanodisc per well

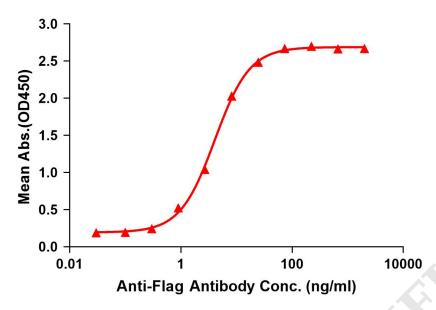

Figure 1. Elisa plates were pre-coated with Flag Tag GPR132-Nanodisc ( $0.2\mu g/per$  well). Serial diluted anti-Flag monoclonal antibody solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-Flag monoclonal antibody binding with GPR132-Nanodisc is 4.100 ng/ml.

Figure 2. WB analysis of Human GPR132-Nanodisc with anti-Flag monoclonal antibody at 1/5000 dilution, followed by Goat Anti-Rabbit IgG HRP at 1/5000 dilution
