Cat. No. FLP100010

## **PRODUCT INFORMATION**

**Target** GPRC5D GPRC5D **Synonyms** 

**Description** Human GPRC5D full length protein on exosome

**Delivery** In Stock **Uniprot ID** O9NZD1 **Expression Host HEK293 Protein Families GPCR** N/A **Protein Pathways** 

The human full length GPRC5D Protein has a MW **Molecular Weight** 

of 38.6 kDa

Lyophilized from sterile PBS, pH 7.4. Normally 5 % Formulation &

- 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient

temperature.

The protein encoded by this gene is a member of the G protein-coupled receptor family. Recent studies demonstrate that GPRC5D is expressed on malignant bone marrow plasma cells, whereas normal tissue expression is limited to the hair

follicle. It may represent a potential target for effector-cell-mediated therapy to treat plasma-

cell disorders like MM.

Usage Research use only

**Background** 

## ELISA assay to evaluate GPRC5D exosome 0.5μg Human GPRC5D exosome per well

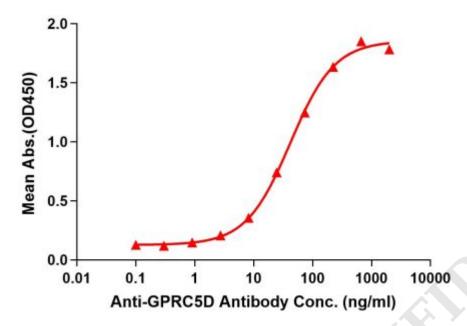

Figure 1. Elisa plates were pre-coated with  $0.5\mu g/per$  well purified human GPRC5D full length protein exosomes. Serial diluted anti-GPRC5D monoclonal antibody (DME100090) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for anti-GPRC5D monoclonal antibody binding with GPRC5D exosomes is 41.99ng/ml.
