Human IFNGR1 Protein, His Tag Cat. No. PME101516

## **PRODUCT INFORMATION**

| Target                          | IFNGR1   |
|---------------------------------|--|
| Synonyms                        | CD119; IFNGR; IMD27A; IMD27B   |
| Description                     | Recombinant human IFNGR1 Protein with C-<br>terminal 10×His tag  |
| Delivery                        | In Stock   |
| Uniprot ID                      | P15260   |
| Expression Host                 | HEK293   |
| Tag                             | C-10×His tag   |
| Molecular<br>Characterization   | IFNGR1(Glu18-Gly245) 10×His tag  |
| Molecular Weight                | The protein has a predicted molecular mass of<br>27.2 kDa after removal of the signal peptide. The<br>apparent molecular mass of IFNGR1-His is<br>approximately 35-55 kDa due to glycosylation.  |
| Purity                          | The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue staining.   |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 %<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature.   |
| Background                      | This gene (IFNGR1) encodes the ligand-binding<br>chain (alpha) of the gamma interferon receptor.<br>Human interferon-gamma receptor is a<br>heterodimer of IFNGR1 and IFNGR2. A genetic<br>variation in IFNGR1 is associated with<br>susceptibility to Helicobacter pylori infection. In<br>addition, defects in IFNGR1 are a cause of<br>mendelian susceptibility to mycobacterial<br>disease, also known as familial disseminated<br>atypical mycobacterial infection. [provided by<br>RefSeq, Jul 2008] |
| Usage                           | Research use only  |
| Conjugate                       | Unconjugated   |
