Human IL1R2 Protein, mFc Tag Cat. No. PME101507

PRODUCT INFORMATION

SynonymsIL1RB; CD121b; IL1R2c; CDw121b; IL-1R7: IL-1R7: IL-1R7: Lerrarial mouse Fc tagDescriptionRecombinant human IL1R2 Protein with C- terminal mouse Fc tagDeliveryIn StockUniprot IDP27930Expression HostHEK293TagC-mouse Fc tagMolecular CharacterizationIL1R2(Phe14-Glu343) mFc(Pro99-Lys330)The protein has a predicted molecular mass of 64.0 kDa after removal of the signal peptide. The apparent molecular mass of IL2R-mFc is approximately 70-130 kDa due to glycosylation. The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining. Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution Storage & ShippingStorage & ShippingThe protein series this gene is a cytokine receptor family. This protein bing and therelukin 1 receptor that belongs to the interleukin 1 receptor that belongs to the interleukin alpha (IL1A), interleukin beta (IL1B), and interleukin 1 receptor, type (IL1R1/IL1RA), and interleukin 1 receptor that belongs to the interleukin ad cytokine receptor that belongs to the interleukin ad cytokine receptor that belong to the interleukin 1 receptor table biolis in multiple transcript variants and protein is oforase form a cytokine receptor family. This protein binds interleukin and interleukin 1 receptor, type (IL1R1/IL1RA), and interleukin 1 receptor type of this indist in administ. the appresent and three other genes form a cytokine receptor gene cluster on chromosome 2012. Alternative splicing results in multiple transcript variants and protein is oforms. Alternative sp	Target	IL1R2
