

PRODUCT INFORMATION

IL21 **Target**

Synonyms IL21;Za11;Interleukin-21

Recombinant Human IL21 with C-terminal mouse **Description**

Fc tag In Stock

Delivery Uniprot ID Q9HBE4 **Expression Host HEK293**

Tag C-Mouse Fc Tag

Molecular

IL21(Gln30-Ser162) mFc(Pro99-Lys330) Characterization

The protein has a predicted molecular mass of

41.6 kDa after removal of the signal peptide. The apparent molecular mass of IL21-mFc is **Molecular Weight**

approximately 35-55 kDa due to glycosylation.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue Purity

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis Formulation & Reconstitution

for specific instructions of reconstitution. Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store Storage & Shipping at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient

temperature.

This gene encodes a member of the commongamma chain family of cytokines with

immunoregulatory activity. The encoded protein plays a role in both the innate and adaptive immune responses by inducing the

differentiation, proliferation and activity of multiple target cells including macrophages,

Background natural killer cells, B cells and cytotoxic T cells.

Dysregulation of this gene plays a role in multiple immune-mediated diseases including lupus, psoriasis and chronic inflammatory diseases. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this
