Human LAMP5 Protein, hFc Tag Cat. No. PME100795

## **PRODUCT INFORMATION**

| Target                          | LAMP5  |
|---------------------------------|--|
| Synonyms                        | LAMP-5;BAD-LAMP;C20orf103  |
| Description                     | Recombinant human LAMP5 protein with C-<br>terminal human Fc tag   |
| Delivery                        | In Stock   |
| Uniprot ID                      | Q9UJQ1   |
| <b>Expression Host</b>          | HEK293   |
| Tag                             | C-Human Fc Tag   |
| Molecular<br>Characterization   | LAMP5(Glu30-Glu235) hFc(Glu99-Ala330)  |
| Molecular Weight                | The protein has a predicted molecular mass of<br>49.2 kDa after removal of the signal peptide. The<br>apparent molecular mass of LAMP5-hFc is<br>approximately 55-70 kDa due to glycosylation.   |
| Purity                          | The purity of the protein is greater than 95% as<br>determined by SDS-PAGE and Coomassie blue<br>staining.   |
| Formulation &<br>Reconstitution | Lyophilized from sterile PBS, pH 7.4. Normally 5 %<br>– 8% trehalose is added as protectants before<br>lyophilization. Please see Certificate of Analysis<br>for specific instructions of reconstitution.  |
| Storage & Shipping              | Store at -20°C to -80°C for 12 months in<br>lyophilized form. After reconstitution, if not<br>intended for use within a month, aliquot and store<br>at -80°C (Avoid repeated freezing and thawing).<br>Lyophilized proteins are shipped at ambient<br>temperature. |
| Background                      | Plays a role in short-term synaptic plasticity in a subset of GABAergic neurons in the brain.[UniProtKB/Swiss-Prot Function]   |
| Usage                           | Research use only  |
| Conjugate                       | Unconjugated   |
|                                 |  |

Human LAMP5 Protein, hFc Tag Cat. No. PME100795
