

## **PRODUCT INFORMATION**

LGALS3BP **Target** 

**Synonyms** 90K;BTBD17B;CyCAP;gp90;M2BP;MAC-2-BP;TANGO10B

Recombinant human LGALS3BP protein with C-Description terminal human Fc tag

**Delivery** Under development

Q08380 **Uniprot ID HEK293 Expression Host** 

C-Human Fc Tag

Molecular

**Background** 

LGALS3BP(Val19-Asp585) hFc(Glu99-Ala330) Characterization

The protein has a predicted molecular mass of 87.89 **Molecular Weight** 

kDa after removal of the signal peptide.

The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue **Purity** 

Formulation & Reconstitution

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use

Storage & Shipping within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins

are shipped at ambient temperature.

The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions. LGALS3BP has been found

elevated in the serum of patients with cancer and in those infected by the human immunodeficiency virus (HIV). It appears to be implicated in immune response

associated with natural killer (NK) and lymphokine-activated killer (LAK) cell cytotoxicity. Using fluorescence in situ hybridization the full length 90K

cDNA has been localized to chromosome 17q25. The native protein binds specifically to a human macrophage-associated lectin known as Mac-2 and

> Email: info@dimabio.com Website: www.dimabio.com

also binds galectin 1.

Usage Research use only

Conjugate Unconjugated
