

PRODUCT INFORMATION

Target	LRRC15
Synonyms	LIB
Description	Recombinant human LRRC15(22-538) Protein with C-terminal human Fc tag
Delivery	In Stock
Uniprot ID	Q8TF66
Expression Host	HEK293
Tag	C-Human Fc tag
Molecular Characterization	LRRC15(Tyr22-Gly538) hFc(Glu99-Ala330)
Molecular Weight	The protein has a predicted molecular mass of 83.9 kDa after removal of the signal peptide.
Purity	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Formulation & Reconstitution	Lyophilized from sterile PBS, pH 7.4. Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage&Shipping	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
Sterility	Products are supplied non-sterile. For cell culture applications, dilute in appropriate medium and sterile-filter (0.22 µm) prior to use.
Background	Enables several functions, including fibronectin binding activity; laminin binding activity; and protein sequestering activity. Involved in several processes, including host-mediated suppression of symbiont invasion; negative regulation of protein localization to plasma membrane; and receptor-mediated virion attachment to host cell. Located in collagen-containing extracellular matrix and plasma membrane. Is active in apical plasma membrane. [provided by Alliance of Genome Resources, Apr 2025]
Usage	Research use only
Conjugate	Unconjugated
