

## **PRODUCT INFORMATION**

**Target MERTK** 

**Synonyms** MER;RP38;c-Eyk;c-mer;Tyro12

Recombinant human MERTK Protein with C-**Description** 

terminal 10×His tag

**Delivery** In Stock **Uniprot ID** Q12866 **Expression Host HEK293** 

Tag C-10×His Tag

Molecular

**Background** 

MERTK(Ala21-Ile505) 10×His tag Characterization

The protein has a predicted molecular mass of **Molecular Weight** 54.0 kDa after removal of the signal peptide.

The purity of the protein is greater than 85% as determined by SDS-PAGE and Coomassie blue

**Purity** 

staining.

Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before Formulation &

lyophilization. Please see Certificate of Analysis Reconstitution for specific instructions of reconstitution.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not

intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Storage & Shipping

Lyophilized proteins are shipped at ambient

temperature.

This gene is a member of the MER/AXL/TYRO3

receptor kinase family and encodes a

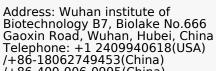

transmembrane protein with two fibronectin type-III domains, two Ig-like C2-type (immunoglobulinlike) domains, and one tyrosine kinase domain. Mutations in this gene have been associated with

disruption of the retinal pigment epithelium (RPE) phagocytosis pathway and onset of autosomal recessive retinitis pigmentosa (RP). [provided by
